

Save Labor Migration Project.

The project is implemented by SOND in Jaffna district since March 2016. It has four major components

1. Access to Information.

Relevant information is provided to the community and the in service migrants in the project location by issuing handbills, using wall hangers and bill boards and street drama. We are also conducting training to the relevant stakeholders.

2. Access to Legal Service.

The grievances of the migrant families are addressed, handled and facilitated.

3. Access to Psychosocial service.

The migrant families are guided by our field staff along with a counsellor. Their psychosocial needs are facilitated by us and sometimes we take up the matter with the relevant government officials.

4. Access to Finance management & Return and Reintegration.

Majority of the migrant families are unable to manage with the existing income and we are providing Finance management training to them to manage with the received income.

We are also helping and supporting the returnees to reintegrate with their family members and plan for the future.

The project is funded by Swiss Development Cooperation.

We are implementing many activities in the above four components in 16 GN divisions in Karaveddy, Pointpedro, Sandilipay and Chankanai DS divisions.

We are working with 769 migrant families in the above divisions with nine staff.

We conduct regular meeting and discussion with the relevant staff to get their support for the project. We are also working with the community leaders and other stakeholders.
